- Based on Percent Wage Increases negotiated in Collective Bargaining Agreements (CBA).
- The “average” is a compilation of each year of increase in the Collective Bargaining Agreement.
- If it is a 3 year CBA and one year has a wage reopener, it is NOT calculated as a ZERO but left blank.
- Some CBAs may have been a one year Agreement. Years 2 and 3 on the spreadsheet are left blank and not calculated in the total average.
- If a CBA has a monetary wage increase rather than a percent increase, it is not calculated into a percent increase.
